

DC - 08YCP-Ultra Charging Station Key Features

It's a well-known fact that mobile phones are unclean objects, but just how unclean are they? Fun fact: each square inch of your mobile phone contains roughly 25,000 germs, making it one of the unhygienic things you come in contact with on a daily basis. Mobile phone hygiene is definitely something to care about.

Our UVC Mobile Charging Locker with Built-in UV Sterilisers securely charges, disinfects, and cleans up to 8 mobile devices at the same time. The lockers sterilizer, thanks to UV-C ultraviolet germicidal properties, against bacteria, viruses, spores, fungi, molds & mites and provide a thorough cleaning and decontamination of mobile devices. The simple to use Charging Station makes sure devices are UV disinfected whilst securely charging. The perfect charging solution for healthcare, education, and hospitality industries.

8 Locker Charging Unit with UV Light.

-Each locker can be opened and closed electronically with a unique PIN Code. Access can be gained via a master override PIN Code, if user inadvertently forgets their PIN Code.

-Voice Assisted Guidance.
